QUIRRI B2B PLATFORM

Test Case Specification

Every automated test case and attack probe, segregated by suite, with its identifier, location, run count and final result

Volume 2 of 3: Test Case Specification

Document	Test Case Specification, companion to the Test Summary Report
Version	1.0, 9 November 2026
Results as of	Final regression, 8 November 2026
Content	1,968 test cases and probes in 141 files, 9 suites
Prepared by	Quirri Engineering, Quality Assurance
Prepared for	Client handover and acceptance

This document is confidential. It records the testing performed on the release candidate and is issued for client handover and acceptance. Results are reported as executed; nothing is reported from an earlier run unless it is labelled as a baseline.

1 How to read this volume

Test cases are grouped by suite, then by file, in source order. Each has a stable identifier **<suite>-<number>**, for example BE-INT-0042. Volume 3 reproduces the source of every file listed here, so a test case can be read at the given line.

Column	Meaning
ID	Test case identifier, unique across the deliverable
Test case	Python test function or JavaScript test title (with its describe path). A grey line under it is the test's own docstring.
Runs	Executions in the final run: parameter values for pytest; browser projects (of 6) for E2E
Line	Line in the source file (Volume 3). Blank for test cases generated from a table (it.each / loops), whose title is built at run time
Result	Final result. 'Fail n of m (known)' marks the two accepted layout failures; 'Skipped' rows are explained in Volume 1 section 6.1

1.1 Suites

Suite ID	Description	Files	Test cases	Runs	Result
BE-API	2. Backend unit, API and security tests	22	255	409	Pass (8 skipped)
BE-INT	3. Backend integration tests (real PostgreSQL)	11	105	1,286	Pass (2 skipped)
BE-VID	4. Video pipeline (edu_video) tests	37	499	602	Pass (2 known failures)
BE-MCQ	5. Quiz (MCQ) tests	7	89	156	Pass
BE-VOI	6. Voice tutor (voice_qna) tests	11	214	357	Pass
FE-UNIT	7. Frontend unit tests (vitest)	38	373	373	Pass
FE-INFRA	8. Frontend infrastructure and configuration tests (vitest)	1	32	32	Pass
FE-E2E	9. End-to-end browser tests (Playwright)	11	352	1,512	Pass
SEC-PRB	10. Manual attack probes (security assessment, 6 Nov 2026)	3	49	49	44 pass, 3 fixed, 2 observations

1.2 Traceability: issues to test cases

Issue identifiers found in test source code (test names, docstrings, comments), mapped to the files and test case ID ranges that verify them. Items fixed in configuration or infrastructure are verified by scan, build or drill evidence and are described in Volume 1.

Issue ID	Test files that name the issue (test case IDs in this volume)
AUTH-006	`tests/integration/test_institution_access.py` (BE-INT-0022..BE-INT-0025)
AUTH-009	Not named in test code; verified as described in Volume 1 section 6-8 (scan, build or drill evidence)
